

Spider,
design by Studio Italia Design, 2015

Suspension

Spider is a round suspension light resembling an eye that can look into any part of the room. By adjusting the angle of the diffuser, the band of light emitted by the LED light can be directed towards a specific point. When mounted on the different clusters available, it can create numerous patterns of light, from functional to decorative, which can be dimmed at will. In Spider, the simplicity of the look underscores the versatility of its performance.

Spider	Light source	Frame Metal	Diffuser: Metal	Code
